### S-TIFAS 99 Series

SITE SIZABLE STAINLESS STEEL

- S-TIFAS 9940 40" Complete Kit
- S-TIFAS 9948 48" Complete Kit
- S-TIFAS 9960 60" Complete Kit
- S-TIFAS 9980 80" Complete Kit
- S-TIFAS 9996 96" Complete Kit

#### Features

- Modify length and outlet location on site
- Indoor or outdoor use
- Stainless steel channel
- 12 gauge. 304L stainless steel perforated grate
- Works with 3" clamp down floor with 4" throat/strainer size (included)
- <u>NOT INTENDED</u> for installation across a barrier-free threshold
- Compatible with: PVC Liner, Rubber Liner (Chloraloy ®), Hot Mop, Lead Pan, Copper Pan, or Fiberglass
- Flow rate 21 gpm per outlet
  - Flow rate measured at outlet only. Measurement does not account for water in channel or sheeting on shower floor.
  - Additional outlets can be added and combined into a larger waste line to increase flow rates

#### Care & Maintenance

S-TIFAS 99 stainless steel linear drain top grates are made of 304L stainless steel. This material is non-porous, hygienic, rust-free and extremely durable. Bar Keepers Friend® and Soft Scrub® are commonly available products that can be used to protect and clean your Satin Stainless drain cover. For stains that have been left for an excessive amount of time, stronger cleaning agents such as Compound 302® may be needed. For Polished Stainless and Oil Rubbed Bronze we recommend a mild soap and a soft cloth for cleaning. DO NOT use any abrasive cleaners, scrub pads or allow household cleaning agents, such as bleach, to sit on the drain cover for a long period of time. Stainless steel does not rust. External factors, such as contamination from other highly ferrous metals, built up road salt, sea salt, or chlorine may have caused "surface" rust which can be removed using Barkeepers Friend®, Soft Scrub® with Bleach, or Compound 302®. Always follow the directions on the bottle. Follow proper maintenance procedures to prevent excessive surface rust. In areas of frequent exposure to salt, chlorine, and other chemical compounds, maintenance of the stainless grates should be performed at least 2-3 times per year.
